Experience

Prepseed | Full Stack Developer

May 2024 – Present | Ahmedabad, India

- Led end-to-end development of **5 projects**, from requirement gathering and client communication to development and deployment.
- Engineered a **CI/CD** pipeline that reduced deployment time from 15 minutes to 6 minutes, achieving a **60% reduction**.
- Built and deployed scalable full-stack applications on **AWS** infrastructure using **MERN** and **Next.js**.
- Leveraged **LLM** APIs in production applications to build AI-powered features, bringing modern AI capabilities to full-stack products.
- Designed and optimized database systems using **MongoDB** and **PostgreSQL** for efficient and reliable data management.
- Integrated **Razorpay** for secure payments and **Delhivery** APIs for efficient order shipping and tracking.
- Implemented **RBAC** to ensure secure and controlled permission management.

SoftCoding Solutions | React Intern

Jul 2023 – Aug 2023 | Remote

- Developed the frontend of the Student Portal Web App, ensuring a user friendly and responsive interface.
- Managed global state using **Redux** and Redux Thunk, enhancing application performance and maintainability.
- Utilized **Chart.js** for visualizing student attendance data, providing clear and interactive insights.

NullClass | MERN Stack Intern

Jan 2023 – Feb 2023 | Remote

- Implemented **JWT** based authentication to secure user sessions and protect API endpoints.
- Ensured the website's responsiveness across mobile and tablet devices, delivering an optimal user experience across all platforms.

Projects

Feedback Fusion | [View Live](#)

Next.js | TypeScript | PostgreSQL | Prisma | Clerk | Shadcn UI

- Engineered a full-stack feedback platform using **Next.js** with secure authentication and user management via **OAuth**.
- Designed and optimized data models using **PostgreSQL** and **Prisma**, enabling efficient and scalable data handling.

i-NAV Tracker | [View Live](#)

React.js | Node.js | Express.js | MongoDB | TypeScript | Tailwind CSS | Ant Design | Docker | Cloudflare

- Developed a **MERN** based ETF tracker with real-time CMP vs i-NAV comparison and **Cloudflare** Turnstile bot protection.
- Architected scalable backend services and integrated **NSE** and **Groww** APIs to deliver accurate, low-latency market data.

Skills

Frontend:

React.js • Redux
Next.js • TypeScript
JavaScript • Tailwind CSS
Ant Design

Backend:

Node.js • Express.js
REST APIs • Socket.IO
JWT • OAuth
Redis • RabbitMQ
Elasticsearch

Databases & ORM:

MongoDB • Mongoose
PostgreSQL • Prisma

Cloud & DevOps:

AWS • EC2 • S3
Lambda • API Gateway
Route 53 • CloudFront
SES • SNS • IAM
Nginx • Vercel • Cloudflare
Docker • YAML • CI/CD
GitHub Actions

Tools & Platforms:

Git • GitHub • Cursor
Claude Code • Codex

Education

L.D. College of Engineering

BE in Electronics and Communication | CGPA: 8.23
2020 - 2024 | Ahmedabad, India

Achievements

- SSIP Hackathon'22 Finalist.
- AWS Cloud Essentials Certified.
- Solved 300+ coding problems across various platforms.
